## Cure Dextra® Closed System

The sterile, single-use Cure Dextra is an innovative closed system catheter featuring smooth, fire polished eyelets on a pre-lubricated catheter integrated with a 1000 ml collection bag. It enables 'No Touch' use which helps reduce the risk of exposure to bacteria that can lead to infection. Proprietary product features are designed to help make the Cure Dextra easy to use – even for individuals with limited hand dexterity.

- Reinforced finger loops on the package help enable easy opening.
- A Support Band on the back of the collection bag helps enable controlled use.
- The Pull Ring helps enable easy removal of the cap on the pre-lubricated introducer tip.
- Tip Advancing Technology with Gripper Arrow helps facilitate ease of use. The catheter advances into the body with each full forward stroke. It does not retract into the bag on the backstroke.
- Perforations in the collection bag help create an opening for easy draining.

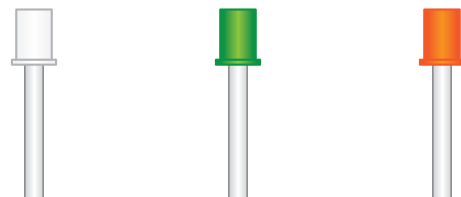

### Unisex, Single

Offered as a case of 90 units

Part No.	Description	FR Size
DEX12	Closed System Single, Straight Tip	12
